

Professor of International Forest Management

80 – 100 % / Permanent / Zollikofen / Start 01.09.2021 or by agreement

To start with, here are some of our strong points

- An almost unbelievably large variety of themes and topics and a great mix of research and teaching.
- Great freedom in work organisation with lots of leeway for your ideas, your creativity and decisiveness.
- Focus on research that is geared towards practical orientation and the education of committed people rather than mere profit maximisation.
- A motley crew of friendly folk from all walks of life awaits you, all with different biographies, views and experiences.
- An informal, relaxed yet respectful togetherness with a great deal of helpfulness.

What you'll be doing here

- Teaching modules in the fields of international forest management and global climate and forest policy in both the BSc and MSc programmes
- Supervising term papers, BSc and MSc theses and doctoral dissertations
- Developing, acquiring and leading research and consultancy projects in the international forest environment with an experienced and motivated team
- Contributing to the development of HAFL and of the Forest Science degree programmes
- Collaborating interdisciplinarily with the other HAFL divisions in an international context

What you'll bring with you

- Doctorate in forest policy, forest and environmental management or a related field
- In-depth knowledge of forest and landscape management and forest-policy processes at international level, in developing and transition countries
- Several years of practical experience gained outside academia as well as research experience in the field of international forest policy and forest Management
- Interest in teaching at university level and teaching experience
- Mother tongue German or French with very good knowledge of English or excellent English with very good knowledge of one of the Swiss national languages

School of Agricultural, Forest and Food Sciences (HAFL)

At HAFL, a department of BFH, we're all about connecting humans, nature and technology towards sustainable development. As a ground-breaking, pioneering think tank, we are engaged in the creation and teaching of knowledge for the world of today and of tomorrow – bright-eyed and bushy-tailed, resilient and always solidly grounded at the same time.
